

FACT SHEET

Resource Components

- Made from 100% Post-Use Glass or Porcelain bonded with Color-Customizable Epoxy Resin Binder

Applications

- Commercial & Residential Flooring
- Countertops, Vanities, Decorative Tables

Environmental Impact

- IAQ: Volatile Organic Compounds (VOC) - Free
- Waste Generated: Uses discarded post-consumer bottles, residential and commercial plate glass, mirror glass, automobile windshield glass, toilets, sinks and tubs diverted from landfills; Waste materials from installations are reused in additional installations
- Durability: Material designed to last the life of the building
- Maintenance: Easily cleaned with neutral, biodegradable soaps or detergents; periodic buffing will maintain finish
- Waxing and Sealing are optional
- Performance: Highly resistant to bacteria growth and chemical stains
- Independent assessment determined that EnviroGLAS products can contribute between four and seven or more USGBC LEED® credits

Characteristics

- Unique, safe, colorful countertops, flooring, and other surfaces in the tradition of terrazzo flooring, utilizing recycled glass or porcelain instead of marble or synthetic materials
- Infinite color choices available

Cost

- 40 Year Life Cycle Assessments demonstrate that Terrazzo applications cost less than \$1.00 per sq ft!
